SKILLS

- Research (Guggul):
- Morphological, Molecular, Biochemical & Agronomical parameters
- Lab Techniques: Biochemical Profiling (Antioxidants, Sugars, Phenols), DNA Extraction (CTAB), Root & Leaf Scanning Morphology Evaluation, Spectrophotometric Analysis
- Domain Knowledge: Agricultural Science, Conservation & PGR Evaluation, Crop Morphology, Plant Biotechnology (Introductory)
- Field Techniques: Germplasm Maintenance, Morphological Observation, Transplantation
- Tools & Software: BioVin, ImageJ, Microsoft Excel (Basic Analysis), UV Spectrophotometer
- Analytical & Technical: Data Collection, Field Observation, Leaf & Root Scanning
- Soft Skills: Attention to Detail, Communication, Curiosity, Independence, Organization, Self-Learning.
- Report Writing: Skilled in report writing and documentation through preparation of RAWE and seed market survey reports.

ABOUT ME

Self-motivated B.Sc. Agriculture (4th Year) student with practical experience in plant genetic resource conservation, morphological evaluation, and biochemical analysis. Completed a 3-month RAWE program at ICAR-NBPGR, contributing to the conservation of Commiphora wightii (Guggul) — an IUCN Red-listed species. Skilled in DNA extraction, biochemical profiling, and digital image-based plant analysis. Recognized for strong self-learning ability, precision in lab work, and a genuine drive to apply scientific principles to real-world agricultural challenges.

WORK EXPERIENCE

ICAR-NBPGR • New Delhi • 08/2025 - 11/2025

Research Trainee – Germplasm Evaluation Unit
Key Achievement: Gained multi-disciplinary exposure across morphological, molecular, and biochemical domains; independently executed complete assay workflows and contributed to endangered crop conservation efforts.
Evaluated morphological traits of 330+ guggul (Commiphora wightii) samples and multiple related species under different growth media
Conducted leaf area and root morphology analysis using ImageJ and BioVin software tools
Performed DNA extraction and purification (CTAB method) for Commiphora and cactus samples to support molecular identification studies
Carried out biochemical analysis of buckwheat, including antioxidant, phenolic, sugar, and starch assays using spectrophotometry
Prepared and analyzed standard curves; calculated compound concentrations from spectrophotometric readings
Maintained a detailed day-wise lab notebook, recording protocols, observations, and reflections for research traceability
Transplanted and maintained Commiphora cuttings at the Natural Gene Bank and field pots for germplasm conservation

College Activity

Artistic Club Member
Participated in art and creative events; developed poster designs and visual illustrations for college programs
Enhanced creativity and visual communication skills applicable to research presentation and documentation
Performed field-based seed market survey under Seed Production Technology course to study seed availability, market trends, farmer requirements, and dealer feedback.

EDUCATION

Bachelor of Science (Hons.) in Agriculture	2022-2026
Galgotias University • Greater Noida • 2022-2026	
Secondary & Primary Education	2008-2022
VVDAV • Vikaspuri • 2008-2022
